

Native Vegetation List: Grantville

This indigenous vegetation list is a guide to assist in selecting plants suitable for growing in the Grantville area. The list is based on the ecological vegetation classes (EVC) appropriate to the area. EVC's are useful in identifying the plant species suitable to area and specific growing conditions. For further information of EVC's visit:

http://vro.agriculture.vic.gov.au/dpi/vro/wgregn.nsf/pages/wg_vegetation_res_evc_descriptions

The EVC's for this area are:

EVC 16 – Lowland Forest

EVC 23 – Herb-rich Foothill Forest

The list of plants below are the recommended species for your area. The list may not include all the species listed in the EVC's due to growing conditions in your area and/or the degree of difficulty to source.

There are a number of local nurseries that supply these species.

Trees

Common Name	Scientific Name
Messmate stringybark	<i>Eucalyptus oblique</i>
Narrow-leaf peppermint	<i>Eucalyptus radiata s.l</i>

Large Shrub or Understorey Tree

Common Name	Scientific Name
Blackwood	<i>Acacia melanoxylon</i>

Medium Shrub
