Funded annual influenza vaccination^h

6 months and over with certain medical risk factors^b

All Aboriginal and Torres Strait Islander people 6 months and over

65 years and over

Pregnant women

a Hepatitis B vaccine: Should be given to all infants as soon as practicable after birth. The greatest benefit is if given within 24 hours, and must be given within 7 days.

b Rotavirus vaccine: First dose must be given by 14 weeks of age, the second dose by 24 weeks of age.

c Refer to the current edition of *The Australian Immunisation Handbook* for all medical risk factors.

d Contact your state or territory health service for school grades eligible for vaccination.

e Observe Gardasil[®] dosing schedules by age and at-risk conditions. 2 doses: 9 to <15 years - 6 months minimum interval. 3 doses: ≥15 years and/or have certain medical conditions - 0, 2 and 6 month schedule. Only 2 doses funded on the NIP unless 12-13 year old has certain medical risk factors.

All people aged 70 years old, with a five year catch-up program for people aged 71-79 years old until 31 October 2021.

g Single dose recommended each pregnancy, ideally between 20-32 weeks, but may be given up until delivery.

h Refer to annual influenza information for recommended vaccine brand for age.

- Contact your State and Territory Health Department for further information on any additional immunisation programs specific to your State or Territory.
- All people aged less than 20 years are eligible for free catch up vaccines.
- Adult refugees and humanitarian entrants are eligible for free catch up vaccines.
