

Pioneer Bay Road and Drainage Improvement Project

Issue 1 – January 2017

Community Workshop 30 November 2016

An interactive workshop was held at Grantville Hall so that Pioneer Bay residents could review information collected from the previous workshop and continue to develop concept designs.

The workshop focussed on aspects of the design related to traffic calming devices and the locations of these devices and footpath layouts. Four traffic calming options and footpath layouts were presented to the residents.

Melbourne Water also attended the workshop and presented information on the proposed waterway, wetlands and diversion works.
